

# Hulam Data Privacy

**Effective Date:** October 31, 2021

This policy explains what information we collect when you use Hulam sites and services. It also has information about how we store, use, transfer, and delete that information. Our aim is not just to comply with privacy law. It's to earn your trust.

## Information We Collect & How We Use It

Hulam doesn't make money from ads. So we don't collect data in order to advertise to you. The tracking we do at Hulam is to make our services work as well as possible.

In order to give you the possible experience using Hulam, we collect information from your interactions with our network. Some of this information, you actively tell us (such as your email address, which we use to track your account, progress or communicate with you). Other information, we collect based on actions you take while using Hulam, such as what pages you access and your interactions with our product feature (like highlights, follows and applause). This information includes records of those interactions, your Internet Protocol address, information about your device (such as device or browser type), and referral information.

## We use this information to:

- Provide, test, improve, promote and personalize Hulam Services
- fight spam and other forms of abuse
- generate aggregate, non-identifying information about how people use Hulam Services

## What information do we collect?

**Contact information.** We collect your contact information to further improve the services we will provide.

**User name and password for account creation.** We require you to create an account to prove your legitimacy and/or in order to use our services provided.

**Search queries.** Our services may include search fields that allow you to search (only within the Services) for content or answers to questions.

**Your content.** We collect comments and other information that Clients post through interactive online features. However, all such information is either canned or moderated to avoid collecting personal information and to help maintain a safe environment for users.
